

Capability Statement ECS Design

ECS DESIGN, INC.

- ✓ Engineering
- ✓ Construction
- ✓ Electrification
- ✓ Energy Infrastructure

Core Competencies

- ✓ Mechanical Engineering
- ✓ Electrical Engineering
- ✓ HVAC Design and Installation
- ✓ Heat Pump Water Heater Systems
- ✓ Building Electrification
- ✓ Commercial and Residential Construction
- ✓ Energy Infrastructure Solutions
- ✓ Distribution Center Operations
- ✓ Project Management
- ✓ Public Agency Coordination

Differentiators

- ✓ California Licensed Engineering and Construction capabilities
- ✓ Integration of engineering design with field implementation
- ✓ Community-focused electrification deployment strategy
- ✓ Workforce development partnerships with technical education institutions
- ✓ Experience supporting transition housing and community revitalization projects
- ✓ Ability to connect technology providers, contractors, agencies, and investors

Strategic Markets

- ✓ Residential Electrification
- ✓ Commercial Buildings
- ✓ Municipal Projects
- ✓ Affordable Housing
- ✓ Transition Housing
- ✓ Real Estate Investment Rehabilitation
- ✓ Energy Infrastructure Modernization

Vision

To become California's premier implementation partner connecting advanced energy technologies with practical community deployment through engineering excellence, workforce development, and public-private collaboration.
